Course Description

This course covers basic to Advanced Java Technologies

Duration

20 days

Eligibility

B Tech. M Tech. MCA with basic programming Knowledge

Benefits

Apply the concepts to real world problems

Test driven development from ground up

Maximising your learning potential

Individual attention and assessment

Course Contents

Topics	Description
Core Java	Object Oriented Programming, Basic Java, Generics, Collections, Lambda, Exception design Reflection, NIO, Serialization, logging, Debugging
Java Concurrency	In depth coverage of multi concurrency API with examples and problem solving exercises
Databases	SQL, Stored procs, triggers, Functions, JDBC Hibernate, Spring JDBC, DAO, JPA, nosql
Java Script	Java Script, JQuery, Ajax, Angular js, Node.js
Web Technologies	Servlets, JSP, HTTP, Struts, Spring MVC.
Frameworks	Spring Core, Spring MVC, Web Services SOAP and REST, JMS
Testing	Junit, Mockito, Selenium, Test Driven Development

“We are amazed at the thoroughness of the course and the large numbers of code examples provided”

“Practical Approach, No Boring Slides, Felt connected, Makes you think”

“Kudos to the seria trainers for the excellent course material- Loved it”

“ I am walking away with a years worth of knowledge in a months time”

“For the time frame this is the most I have ever learned. Essentially covering what I can learn in 2-3 years in just one month”

Exposure to more and more code takes the fear away and optimises the performance of the engineer to your organisation requirements
